

Con Edison Notice

Street Closure

As part of the water treatment plant installation project currently in progress at the 74th Street Station, Con Edison will have 6 large tanks delivered to East 74th Street. All equipment deliveries will occur on the night shift between the hours of 6:00PM and 6:00AM in order to minimize the effect on traffic on 74th Street.

They will be closing East 74th Street on the night shifts from Wednesday, October 22, 2008 to Friday, October 24, 2008. In order to offload these tanks, a crane must be used to lift the tanks off the trailer load them into the building. Two tanks will be offload each night and the street will re-open at 6:00AM the following morning.
